SKILLS

- Communication
- Creativty
- iOS Development
- Problem Solving
- Python Programming
- Teamwork
- UI/UX Design
- Web Development/Design

PROFILE

I am a Designer, Developer, and Space Enthusiast. Developing apps, websites, and other computational programs has always been one of my favourite things to do. Studying Computer Science in school and college helped me deepen my understanding of technology and its potential. Alongside this, my passion for space and astrophysics gets me on-set to explore the universe's complex structure and integrate it into my projects. I always aim to innovate, whilst blending creativity with functionality, crafting intuitive User Interfaces, writing efficient code and designing amazing "out-of-the-box" solutions.
